

Load balancers -

Load balancers (1)

What's new?

Elastic Load Balancing scales your load balancer capacity automatically in response to changes in incoming traffic.

Anomaly mitigation: Not applicable

Deregister

Register targets

Target groups route requests to individual registered targets using the protocol and port number specified. Health checks are performed on all registered targets according to the target group's health check settings. Anomaly detection is automatically applied to HTTP/HTTPS target groups with at least 3 healthy targets.
